

# MEET THE CONSTRUCTOR

You are invited to attend:

## Meet the Constructor Silverton Wind Farm Project

Date: **Tuesday, 31 January, 2017**

The 'Meet the Constructor – Silverton Wind Farm Project' is the first event to be held in the region during 2017.

The event brings together local businesses, job seekers and senior project representatives from AGL Energy (AGL), GE and CATCON to learn about the opportunities on the Silverton Wind Farm following the recent achievement of financial close. This will provide an opportunity for businesses and job seekers to meet key project personnel with responsibility for the design of the wind farm, sourcing business solutions, purchasing goods and services.

This Meet the Constructor event will focus on a range of materials, goods and services that will need to be procured during the construction phase of the Silverton Wind Farm Project.

GE, the world's Digital Industrial Company and Australian civil engineering construction company, CATCON, have been awarded the contract to develop and build the \$450 million Silverton Wind Farm, in what will be the sixth largest wind farm in Australia. GE and CATCON are strongly committed to working with Australian and local businesses and organisations to deliver local employment and supply chain opportunities. Senior representatives from AGL, GE and CATCON bring this event to the local Silverton and Broken Hill communities, so come along and meet with representatives to investigate how you or your business can be part of the Silverton Wind Farm Project.
